Designed and developed a cutting-edge platform for transparent ESG data communication, featuring intuitive visualizations and interactive dashboards. Integrated real time data feeds for accuracy, ensuring a seamless user experience across devices. Contributed to advancing corporate sustainability and transparency, leveraging frontend skills to empower organizations in showcasing their responsible practices.

Responsibilities:

Designing and developing web pages using React.js, Redux, HTML5, CSS3, Bootstrap, JavaScript and Material. Ui Tailwind. Developed the application for responsive to different screen resolutions using Bootstrap and CSS3 media query. Managing application-level state by using Redux and Redux hooks – use Dispatch, use Selector. Designing and using dynamic and reusable components

Project 2

Project 2 || Vehicle Management System (VMS)

Role: Software Engineer

Description:

The Vehicle Management System is designed to track the vehicle and Driver. This project consists of the vehicle allocation as individual or in group. Users will be notified from time to time about completion of allocation and release of driver or vehicle. This project aims to revolutionize the management of vehicles, enhancing efficiency, reducing operational costs, and ensuring the longevity of the fleet. Integrate with mapping services to provide real-time location tracking of vehicles.

Responsibilities:

UI development by using React JS with React Hooks. Managing application-level state by using Redux and Redux hooks.

Highly complex components designing by using React with minimum usage of third party NPM packages. Designing and using dynamic and reusable components. Implementation of connectivity with API services by using axios or fetch. Pushing and pulling code to GitHub repo.

Project 3

Project 3 || Trucktion

Role: Software Engineer:

Description:

Daimler intends to create a common marketplace for the Fleet Owners and Load Owners, So the load owners can post the load at any time where fleet owners can bid, get confirmation and start transit

Responsibilities:

Designing and developing web pages using React.js, Redux, HTML5, CSS3, Bootstrap, JavaScript and Material ui. Developed the application for responsive to different screen resolutions using Bootstrap and CSS3 media query. Designing and using dynamic and reusable components
