

GitHub Daily Workflow Cheatsheet

1. Clone Repository (first time only)

```
git clone <repo-url>  
cd <repo-folder>
```

2. Create Branch

```
git checkout main  
git pull origin main  
git checkout -b feature/your-task
```

3. Do Your Work

(Edit, test, build locally)

4. Stage & Commit

```
git add .  
git commit -m "feat: your message"
```

5. Sync with Main

```
git fetch origin  
git merge origin/main
```

6. Push Branch

```
git push origin feature/your-task
```

7. Create Pull Request

(Create PR on GitHub → add title & description)

8. Code Review & Changes

(Commit & push updates → PR auto-updates)

9. Merge PR

(After approval → Merge into main/develop)

10. Sync Local Repo

```
git checkout main  
git pull origin main  
git branch -d feature/your-task  
git push origin --delete feature/your-task
```
